

Sturdy, quality, and reliable warning lights featuring a high degree of customization. They are used in many industrial and automotive markets.

FEATURES

- Suitable for many industrial and automotive markets.
- IP protection degree: they are classified IP 65.
- Bodies made of ABS providing great resistance to impacts and vibrations.
- Featuring polycarbonate lenses for a better and powerful light transmission and diffusion.
- Extreme temperature resistance: -20°C to +50°C.
- All materials and components used are wear resistant and guarantee protection of the unit against water and dust.

OPTIONS

- High degree of customization and different solutions available for each kind of market: stack lights, signal beacons, warning horns, RGB warning lights, LED warning horns, electronic sirens, obstruction lights and heavy-duty warning lights.
- Available with SMD or POWER LEDs for a long-lasting light quality.

PRODUCT FAMILIES

- Stack lights (page 2).
- Modular stack lights (page 6).
- Multicolour RGB warning lights (page 8).
- Universal signal beacons (page 13).
- LED warning horns (page 22).
- Beacon horns (page 28).
- Electronic sirens (page 33).
- Obstruction lights (page 36).
- Heavy duty warning lights (page 40).
- Crane & forklift safety lights (page 45).
- Machine tool lights (page 47).
- Motor and alarm sirens (page 48).

CERTIFICATIONS

- CE marking and EAC certification.
- RoHS and E37* homologation.

* Not available on all versions.

STACK LIGHTS

Suitable for status indication in industrial manufacturing and process control environments, where a local audio and video signal is required. A specific colour-coding is usually assigned by the system designer, and the most commonly used colours for status indication typically include red, yellow, green, blue, white.

- Red: failure conditions (i.e. emergency stop, machine fault, etc.).
- Yellow: warnings (i.e. over-temperature, over-pressure, etc.).
- Green: normal machine or process operation.
- Blue: external intervention request (i.e. request for raw material, programming or maintenance personnel, etc.).
- White: user-defined conditions related to a specific machine, often referring to productivity monitoring.

Light colours
R = Red
G = Green
Y = Yellow
B = Blue
W = White

Indicate the sequence of colours required on the base of the number of colours.
The first colour is on top.
Bear in mind that the maximum number of colours is 5, so if you need a lower number of colours, you will have to fill in the remaining characters of the code with the letter "X".

Please, see the example above: choosing 3 colours, you have to fill in the remaining characters of the code with 2 letters "X".

Instructions

Fill in the boxes with the numbers/letters corresponding to the specifications required, thus obtaining the stack light code, as shown in the example below.

Special version with a 7-melody acoustic signaler

Code **TERMSL3E2RYGXX00CS18** – 3 Colours (red, yellow, green) Stack Light, featuring steady lights, a 7-melody acoustic signaler, and a 24 Vdc power supply..

MODULAR STACK LIGHTS

Modular light systems operating at 12-24 V AC/DC or 85-250 V AC/DC, designed to provide both visual and audible alerts.

Used for status indication in industrial manufacturing and process control environments, the modular stack lights consist of three modules: a base body (main module), up to six LED stackable layers with independent colour and light mode control and a buzzer module with seven melodies (optional top layer).

The LED layers feature customizable colours according to customer preferences. Each layer includes a lens body and dual-sided LED boards, with spring-loaded pins on both the top and bottom sides for easy connection.

MULTICOLOUR RGB WARNING LIGHTS

High-quality and energy efficient indicators providing different colour options by mixing the primary colours (red, green and blue) featuring the order priority red – green – blue - yellow.

Featuring a potentiometer to adjust the volume intensity and a pushbutton for selecting between the different available light and sound versions.

Suitable to be connected to a PLC.

UNIVERSAL SIGNAL BEACONS

Multifunction signals featuring the possibility to cover several functions through a single beacon: in case of change of conditions, their function can be quickly and easily modified without buying a new device. Depending on the model, the multifunction LED beacons can display up to 5 operating modes with the steady, flashing, strobe, rotating light functions.

Featuring a potentiometer to adjust the volume intensity and a pushbutton for selecting between the different available light and sound versions.

Available both in the version with Power and SMD LEDs, with a different number of LEDs depending on the model: the high-performance version is equipped with 5x3W Power LEDs and the other models with 45 SMD LEDs.

The Power LEDs produce light for longer distances by their angular light characteristics while the SMD LEDs guarantee a more diffused light.

If the Metal tube nut-connect is required, please, specify the tube code after the colour code.

T10 = 10 cm Metal tube nut-connect

T20 = 20 cm Metal tube nut-connect

T30 = 30 cm Metal tube nut-connect

Special versions	Suffix (to be added at the end of the selected product code)**
Separate control for sound and lights, clean contacts	CS2
24 V AC/DC power supply	CS3
Powerful sound	CS10
Separate control for sound and lights, clean contacts + Powerful sound	CS16
Separate control for sound and lights, clean contacts + Powerful sound + 24 V AC/DC power supply	CS17

** To order the special versions, specify the complete product code in the order, adding the suffix corresponding to the desired special version at the end.

90 Universal Signal Beacons

Lens Diameter	90 mm
LED module type	45 SMD LED / 5 x 3 W Power LED
Light colours	Red, green, yellow, blue, white
Light modes	Steady, flashing, strobing, rotary
Sound	10 melodies
Sound & Light changing button	Yes
Mounting types	Surface & wall
Protection cage against strokes	Yes
Markings and homologations	CE EAC RoHS E37

LED WARNING HORNS

Multi-sound with Multi-light LED Horns offering a perfect match, which aims at the highest quality in audio and signaling alerting. Depending on the model, they are available with 2 - 7 and 16 options up to 130 dB.

Featuring a potentiometer to adjust the volume intensity and a pushbutton for selecting between the different available light and sound versions.

Suitable for use on cranes, weaving machines, ships, in mines, ports, warehouses, panels, electronic control panels and in several industries such as mechanical engineering, automation, automotive.

CERTIFICATIONS

Conformity to Community Directives	2014/35/UE Low Voltage Directive
Conformity to CE Standards	EN 60598-1 Luminaires - General requirements and tests EN 60529-1 Degrees of protection provided by enclosures
Markings and homologations	CE ENEC RoHS

GENERAL TECHNICAL SPECIFICATIONS

Ambient temperature	Operational -20°C/+50°C
IP protection degree	IP 65
Materials	Lens: Polycarbonate
	Housing: ABS
Lens Diameter	70 mm
LED module type	SMD
LED life duration	50,000 hrs
Light colours	Red, green, yellow, blue, white
Light modes	Steady, flashing, strobing, rotary
Voltage options	12-24 V AC/DC
	40-250 V AC/DC
	24 V AC/DC
	220 V AC
Sound	16 melodies
Volume	124 - 130 dB
Sound and Light control	Separate control available
Mounting types	Wall
Protection	Resistant to water, dust, heat and UV rays
Warranty	2 Years

BEACON HORNS

Multi-sound with Multi-light Beacon Horns offering a perfect match, which aims at the highest quality in audio and signaling alerting. Depending on the model, they are available with 2 - 7 and 16 options up to 130 dB.

Featuring a potentiometer to adjust the volume intensity and a pushbutton for selecting between the different available light and sound versions.

Suitable for use on cranes, weaving machines, ships, in mines, ports, warehouses, panels, electronic control panels and in several industries such as mechanical engineering, automation, automotive.

CERTIFICATIONS

Conformity to Community Directives	2014/35/UE Low Voltage Directive
Conformity to CE Standards	EN 60598-1 Luminaires - General requirements and tests
	EN 60529-1 Degrees of protection provided by enclosures
Markings and homologations	CE ENEC RoHS

GENERAL TECHNICAL SPECIFICATIONS

Ambient temperature	Operational -20°C/+50°C

OBSTRUCTION LIGHTS

Low-intensity Type B Obstruction Lights, manufactured in compliance with ICAO (Annex 14) Standards.

Depending on the level of light, they activate in darkness and deactivate in daylight, thanks to a specific twilight sensor* that ignores temporary light reductions (up to 30 seconds) and prevents false triggering. They provide NO and NC relay outputs in the event of a 30% light reduction or power failure.

Designed to make skyscrapers, towers, and wind turbines visible to passing aircraft, with 360° visibility range from up to 10 km.

CERTIFICATIONS

Conformity to Community Directives	2014/35/UE Low Voltage Directive
Conformity to CE Standards	EN 60598-1 Luminaires - General requirements and tests EN 60529-1 Degrees of protection provided by enclosures
Markings and homologations	CE ENEC RoHS

* The twilight sensor is included as standard. Continuous 24/7 operation is available upon request.

GENERAL TECHNICAL SPECIFICATIONS

Ambient temperature	Operational -20°C/+50°C
IP protection degree	IP 65
Materials	Lens: Polycarbonate
	Housing: ABS, metal
Lens Diameter	100 mm and 125 mm
LED module type	SMD
LED life duration	50,000 hrs
Light colours	Red, green, yellow, blue, white
Light modes	Steady, flashing, strobing
Voltage options	12 V DC
	24 V DC
	48 V DC
	85-250 V AC/DC
Mounting types	Surface & wall
Protection	Resistant to water, dust, heat and UV rays
Visibility distance	10 Km
Visibility degree	360°
Option	Wireless (only for Solar Obstruction Light)
Warranty	2 Years

Sound	7 melodies
Housing	Metal
Mounting types	Surface & wall
Protection cage against strokes	Yes
Markings and homologations	CE EAC RoHS

Buzzer	Protection cage	Power supply	Code
125-133 dB	Yes	12-30 V DC	TERMHD0400#
125-133 dB	Yes	48 V DC	TERMHD0401#
125-133 dB	Yes	85-250 V AC/DC	TERMHD0402#

Please, specify the colour code within your orders by inserting the corresponding letter of the chosen colour instead of the character "#".

R = Red (R)

G = Green (G)

Y = Yellow (Y)

B = Blue (B)

W = White (W)

Heavy Duty Warning Sirens TERMHD05 series

Sound	7 melodies
Housing	Metal
Mounting types	Surface & wall
Markings and homologations	CE EAC RoHS

Buzzer	Power supply	Code
125-133 dB	12-30 V DC	TERMHD0500
125-133 dB	48 V DC	TERMHD0501
125-133 dB	85-250 V AC/DC	TERMHD0502

Heavy Duty Beacon Sirens TERMHD06 series

Lens Diameter	125 mm
LED module type	3 W Power
Light colours	Red, green, yellow, blue, white
Light modes	Strobing
Sound	7 melodies
Housing	Metal
Mounting types	Surface & wall
Protection cage against strokes	Yes
Markings and homologations	CE EAC RoHS

Buzzer	Protection cage	Power supply	Code
125-133 dB	Yes	12-30 V DC	TERMHD0600#
125-133 dB	Yes	48 V DC	TERMHD0601#
125-133 dB	Yes	85-250 V AC/DC	TERMHD0602#

Please, specify the colour code within your orders by inserting the corresponding letter of the chosen colour instead of the character "#".

R = Red (R)

G = Green (G)

Y = Yellow (Y)

B = Blue (B)

W = White (W)

Heavy Duty Beacon Sirens TERMHD07 series

LED module type	SMD LED
Light colours	Red, green, yellow, blue, white
Light modes	Steady, flashing, strobing
Sound	7 melodies
Housing	ABS
Mounting types	Wall
Markings and homologations	CE EAC RoHS

Buzzer	Power supply	Code
125-133 dB	12-30 V DC	TERMHD0700#
125-133 dB	48 V DC	TERMHD0701#
125-133 dB	85-250 V AC/DC	TERMHD0702#

Please, specify the colour code within your orders by inserting the corresponding letter of the chosen colour instead of the character "#".

R = Red (R)

G = Green (G)

Y = Yellow (Y)

B = Blue (B)

W = White (W)

HEAVY DUTY WARNING LIGHTS - SPARE PARTS

Description	Category	Colour	Code
Ø125 PC-Lens	Heavy-Duty Sirens	Red	TERMSPO100R
Ø125 PC-Lens	Heavy-Duty Sirens	Green	TERMSPO100G
Ø125 PC-Lens	Heavy-Duty Sirens	Yellow	TERMSPO100Y
Ø125 PC-Lens	Heavy-Duty Sirens	Blue	TERMSPO100B
Ø125 PC-Lens	Heavy-Duty Sirens	White	TERMSPO100W
Ø125 Metal protection cage	Heavy-Duty Sirens	Grey	TERMSPO700
Metal surface bracket	Heavy-Duty Sirens	Grey	TERMSPO401

CRANE & FORKLIFT SAFETY LIGHTS

Suitable to be mounted on cranes and forklifts, they provide the operators with a better control over the load and increase their safety at work, especially in crowded workspaces.

CERTIFICATIONS

Conformity to Community Directives	2014/35/UE Low Voltage Directive
Conformity to CE Standards	EN 60598-1 Luminaires - General requirements and tests
	EN 60529-1 Degrees of protection provided by enclosures
Markings and homologations	CE ENEC RoHS

GENERAL TECHNICAL SPECIFICATIONS

Ambient temperature	Operational -20°C/+50°C
IP protection degree	IP 65 / IP 67
	IP 65 / IP 68
Materials	Lens: Polycarbonate Glass, Tempered Glass
	Housing: Metal
LED module type	Power LED
LED life duration	50,000 hrs
Light colours	Red, blue, white
Light modes	Steady, steady point light, steady line light
Voltage options	12-30 V DC
	10-30 V DC
	10-48 V DC
	10-60 V DC
	10-80 V DC
Mounting types	Machinery, forklift, crane mount
Protection	Resistant to water, dust, heat and UV rays
Warranty	2 Years

STANDARD CODES AND OVERALL DIMENSIONS (mm)

TERMSF01 series - 10W Forklift Safety Lights

Light colour	Light shape	Protection Rate	Power supply	Code
Red	Point	IP 65 / IP 67	10-60 V DC	TERMSF0100
Blue	Point	IP 65 / IP 67	10-48 V DC	TERMSF0101

TERMSF02 series - 10W Forklift Safety Lights

Light colour	Light shape	Protection Rate	Power supply	Code
Red	Line 	IP 67	10-48 V DC	TERMSF0200

18W Forklift Safety Lights

Light colour	Light shape	Protection Rate	Power supply	Code
Red	Line 	IP 65 / IP 67	10-80 V DC	TERMSF0300
Blue	Line 	IP 65 / IP 67	10-80 V DC	TERMSF0301

27W Forklift Safety Lights

Light colour	Light shape	Protection Rate	Power supply	Code

MOTOR AND ALARM SIRENS

Motor sirens featuring powerful low-frequency sound, designed to effectively alert large areas by an immediately recognizable sound.

CERTIFICATIONS

Conformity to Community Directives	2014/35/UE Low Voltage Directive
Conformity to CE Standards	EN 60598-1 Luminaires - General requirements and tests EN 60529-1 Degrees of protection provided by enclosures
Markings and homologations	CE

STANDARD CODES AND OVERALL DIMENSIONS (mm)

Motor Sirens TERMMS01 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal
Volume	108 dB
Frequency	50/60 Hz
Cycle	1000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
24 V DC	40 W	2.5 A	TERMMS0100
220 V AC	40 W	0.5 A	TERMMS0101

Motor Sirens TERMMS02 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal - plastic
Volume	112 dB
Frequency	50/60 Hz
Cycle	5000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
24 V DC	40 W	3 A	TERMMS0200
220 V AC	40 W	0.8 A	TERMMS0201

Motor Sirens TERMMS03 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal
Volume	130 dB
Frequency	50/60 Hz
Cycle	10000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
24 V DC	65 W	3 A	TERMMS0300
220 V AC	65 W	0.65 A	TERMMS0301

Motor Sirens TERMMS04 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 40
Housing material	Metal
Volume	105 dB
Frequency	50 Hz
Cycle	16000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
220 V AC	250 W	1.25 A	TERMMS0400

Motor Sirens TERMMS05 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 40
Housing material	Metal
Volume	110 dB
Frequency	50 Hz
Cycle	12000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
220 V AC	300 W	1.5 A	TERMMS0500

Motor Sirens TERMMS06 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal
Volume	115 dB
Frequency	50 Hz
Cycle	8000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
220 V AC	350 W	1.7 A	TERMMS0600

Motor Sirens TERMMS07 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal
Volume	120 dB
Frequency	50 Hz
Cycle	6000 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
220 V AC	300 W	1.7 A	TERMMS0700

Motor Sirens TERMMS08 series

Ambient temperature	Operational -20°C/+40°C
IP protection degree	IP 44
Housing material	Metal
Volume	130 dB
Frequency	50 Hz
Cycle	4500 rpm
Max. duration of use	3 min.

Power supply	Power output	Current	Code
220 V AC	350 W	1.8 A	TERMMS0800

LED Warning Sirens

IP protection degree	IP 65
Housing material	ABS/PC
Volume	100 dB
Light mode	Flashing

Power supply	Current	Code
220 V AC	95 mA	TERMMS0900
24 V DC	150 mA	TERMMS0901

Warning Sirens

Power supply	Current	Code
220 V AC	95 mA	TERMMS1000
24 V DC	150 mA	TERMMS1001

IP protection degree	IP 65
Housing material	ABS
Volume	91 dB

LED Fire Alarm Sirens

Power supply	Power	Current	Code
220 V AC	/	98 mA	TERMMS1100
24 V DC	0.96 W	40 mA	TERMMS1101

IP protection degree	IP 21
Housing material	ABS
Volume	90-100 dB
Light mode	Flashing

Fire Alarm Sirens

Power supply	Power	Current	Code
220 V AC	/	50 mA	TERMMS1200
24 V DC	0.48 W	20 mA	TERMMS1201

IP protection degree	IP 21
Housing material	ABS
Volume	90-100 dB
